
KITCHEN, DINING ROOM, BATH & BASEMENT REMODEL

Kitchen Before Remodel

Kitchen After Remodel

New cabinets, granite counters and floor

Dining Room

New Half Bath

First Floor & Basement Remodel

The goals for this project were to enlarge the kitchen, include a desk for phone and computer use, add a half bath and convert the basement into a family room.

In the redesign process, we moved the kitchen wall into the dining room and installed a structural beam to enlarge the kitchen. Granite counters and a tile back splash add quality and finishing touches.

Electric service and plumbing were upgraded to facilitate the renovation.

A half bath replaced an under utilized closet and a kitchen wall moved into the dining room to increase kitchen floor space.

Part of the unfinished basement was refinished into a family room.

Improvements include:

- *Enlarged state-of-the-art kitchen*
- *New half bath*
- *New floor plan with improved traffic flow*
- *Partial finished basement*
